[Derek Piotr](#) has remixed [Disasterpeace](#)'s "Mycellium."

The original track is taken from Disasterpeace's *Hyper Light Drifter* album, out now on [Bludhoney Records](#). Richard Vreeland, the LA-based man behind Disasterpeace, reached out to Piotr about a remix, and he chose "Mycellium."

"He considers the track more of a Piotr production at this point, and less of a straight remix," Piotr explains. "He give his blessing and says further, "...it's not even discernible as being related to the original, it's a totally new thing in my opinion. It's your track now."
